

Hanging Column Graphic Displays

Looking for a display to be suspended from a ceiling? We have a great display that ships pre-assembled to make installation an easy success! Our hanging column displays are a quick and easy way to attract attention. This display is designed with two frames. Each frame has two locks in each corner for additional support (image "A" below). We have also added a braided stainless steel cable connected to both frames for additional safety (image "B" below). Call us today to discuss this frame!
