## **Insert Installation Instructions**

## **Important! Before you start:**

Clean your hands thoroughly to prevent contamination of the fabric insert. (Call us to order cleaner if necessary)

Inserts have a gasket sewn on the *back side* edge as shown below:

**<u>Step 1-</u>** Install fabric *front side* in one corner as shown below: (6-8" each way)

**<u>Step 2-</u>** Repeat the process in the other corners, being careful not to stretch the fabric out of shape.

<u>Step 3-</u> Finish installing the remaining corners as shown below: <u>DO NOT</u> STRETCH THE FABRIC LEADING TO FIT <u>PROBLEMS!</u>

**Step 4-** Starting at the midpoint on each side, tuck the fabric straight in going from the middle to each corner to ensure a smooth finished look. Make sure all fabric is <u>completely inserted</u> into the frame groove.
